

The Goodman Houses at RESTON

Charles M. Goodman Associates, A.I.A., is the prominent architect of the First Village hillside cluster. Groups of townhouses have been arranged around intricately paved terraces, which in turn are leveled into a wooded hilltop. The Goodman Houses overlook the Village Center and Lake Anne. Sharp changes in roofline, varying sizes, and contrasting textures accented by vivid colors contribute to a townhouse setting of great beauty. A variety of designs and facilities include 2, 3 and 4 bedrooms, rooftop terraces, balconies, playrooms, private studies, family rooms and recreation rooms. There is underground garage parking or carports for some models, large parking areas for others. Landscaped pedestrian paths, completely free of traffic, lead to shops in the Village Center, schools and recreation facilities. The Goodman Houses are an ideal application of contemporary townhouse design to a naturally wooded site.
