

SHARP'S
2502 Gold Cup Lane

Ed and Bev Sharp and their ^{two} 2 sons and one dog live in a spectacular
contemporary home designed specifically for ~~xxx~~ ^{its} nautral wooded setting.
Built in 1968, this is Reston's first stucco house. The recent addition includes
a garage with a playroom above and a master bathroom with a 7-foot diameter
soaking ~~xx~~ tub and an adjoining sunning courtyard.

The Sharps worked with architect Charles F. D. Egbert for ~~xx~~ one year on
the design. The result is ~~xxx~~ well suited to the living pattern of this very
active family. Bev Sharp says, "In six years, we have had to make one major
change--we moved a telephone. Designing and building our own home was an
exciting, rewarding experience. I would do it again!"

The structure steps gently down the wooded slope and is at the same time
private and open to the land. This beautifully designed and imaginatively
decorated home is a must to see.
